Arabian Pearl Engineering (Pvt) Limited

General Business Activities

Arabian Pearl Engineering (Pvt) Ltd has been established in 2010 to carry on the business of large power plants and oil & gas industries civil, mechanical, electrical and instrumentation works. Specialized in fabrication, erection, repairing, commissioning and maintenance of high pressure boilers, all kinds of above and underground piping(CS, SS, GRP, FRP, HDPE, ductile iron), steel structure, heavy duty gas turbines, steam turbines, gas compressors. Sandblasting, painting and coating for large diameter main CW underground piping as well as small diameter pipes and structure. Grit blasting for lube oil tanks and turbine rotors. Precise lube oil flushing for LO and hydraulic oil system. Power plants new transforms oil dehydration and purification as a part of commissioning. We are specialized for solar power system installation, commissioning and startup for light industries and residential.

Highly and semiskilled manpower suppliers for outages and routine maintenance jobs at power plants, fertilizers and oil & gas industries.

We are specialized for heavy duty surface condensers cleaning by using high hydro jetting machines.

We are material and equipment supplier for industries as well as providing scaffolding material and other equipment as a rent.

We are manufacturers of steel planks, Special lifting tools for gas turbines, steam turbines and gas compressors, rotor preservation containers, high temperature insulation pillows for steam turbines, mechanical seals, boiler duct & bellows, nuts, bolts, screws and all kind of machinery parts, cycle parts, tool makers, metal works, and to buy / sell plant equipment, alter, let on hire and deal in machinery installations.

To carry on business acquiring, constructing, owning, managing, setting up and operating various industries i.e. power plants, fertilizers and oil & gas industries.

To carry on the business of industrial technical consultants, technical and mechanical, electrical and civil engineers, industrial surveyors, valuers, appraisers.

Company Strategy

Purpose: To be a leader in the industrial plant installations, commissioning and maintenance in particular of Gas Turbine, Steam Turbine, Gas Compressors and light & heavy mechanical equipment's.

Vision: To provide high quality services that exceeds the expectations of our esteemed customers.

Mission Statement: To build long term relationship with our existing and new customers and clients. Provide exceptional customer services in terms of all engineering requirements by pursuing business through innovation and advance technologies.

Core Values: We believe in treating our customers with respect and faith, we grow through creativity, invention and innovation. We integrate honesty, integrity and business ethics into all aspects of our business deals.

Goal: Regional and international expansion in the field of engineering services, industrial plant installations and maintenance, develop a strong base of regional international key customers. Increase the assets and humane investment of the company by capturing the international business relating to industrial engineering support and installations to become a key player in international engineering industries.

Scope of Work: Arabian Pearl Engineering (Pvt) Ltd conducts mechanical, electrical and engineering services in the sector of industrial plant installations. Arabian Pearl Engineering (Pvt) Ltd undertakes all installations and periodical maintenance services. The company also caters the emergency plant shutdown, plant maintenance, providing necessary mechanical parts to make the plant working in as quick as possible strategy.

Financial Considerations: The Company expects to reach the desired profits in first 12 to 18 months and does not anticipate serious cash flow problems. The company's current business growth is approximately 25% per year. For the first-year company's sales forecast is 120,000 GBP.

High Pressure Boiler Tubes Repairing

70 MW Steam Turbine

Gas Turbine GE 10/1 Rotor lifting

Gas Turbine GE 10/1 Rotor lifting

Gas Turbine GE 10/1 Rotor *Inspection*

10 MW Steam Turbine Rotor Replacement

- ▶ *Manufactured Steel Planks*
- ▶ *Provided Scaffolding for high pressure boilers*
